PROFESSIONAL SUMMARY

Information Technology graduate and Corvit Systems–trained AI practitioner with hands-on experience building and deploying LLM-powered applications. Developed six AI applications using Python, Streamlit, LangChain, and OpenAI APIs, including RAG systems with FAISS/Chroma and an agentic market-research pipeline with schema validation, quality-control workflows, and 79 unit tests. Strong foundation in Machine Learning, NLP, Generative AI, Agentic AI, and AI application development. Seeking an Associate AI Engineer opportunity to build reliable, production-minded AI solutions.

TECHNICAL SKILLS

Programming	Python, SQL, JavaScript, PHP
AI & Machine Learning	Machine Learning, Deep Learning, NLP, NLG, Generative AI, Agentic AI
LLM & AI	LLM Applications, RAG, Prompt Engineering, OpenAI API, LangChain, Vector Databases
Frameworks & Tools	Streamlit, FastAPI, REST APIs
Vector DBs	FAISS, Chroma
Web & Backend	HTML5, CSS3, JavaScript, PHP, RESTful API Integration
Databases	MySQL, MariaDB
Deployment & Cloud	Production Deployment, Cloud Integration, Application Optimization, Microsoft Azure Fundamentals

AI / ML PROJECTS

Travel Agent AI

- Built an AI-powered travel assistant for personalized recommendations and itinerary planning using Python, LLMs, and Streamlit.

SupportPearlz — AI Customer Support Assistant

- Developed a Generative AI customer-support assistant with conversational responses and an interactive Streamlit interface.

MarketMind AI — Agentic Market Research

- Built an agentic AI system for automated market research using LLM-based planning, research workflows, and Streamlit.
- Implemented schema validation, quality-control workflow, and automated testing with 79 unit tests.

RAG Agent — Retrieval-Augmented Generation

- Built a RAG application using document retrieval, embeddings, vector search, and LLMs to generate context-aware responses.
- Implemented vector-based retrieval using FAISS/Chroma technologies.

FinWise AI — Financial Analysis Assistant

- Developed an AI financial assistant using Python, LangChain, and Streamlit for financial analysis, budgeting, risk assessment, and recommendations.

MediGuide AI — Healthcare Guidance Assistant

- Built an LLM-powered guidance assistant using LangChain and Streamlit with structured responses, multilingual support, and emergency detection.

MACHINE LEARNING & AI SYSTEMS

Machine Learning ETA Predictor — QuickBite Delivery System

- Developed an end-to-end regression architecture with statistical evaluation, validation, and model diagnostic/residual analysis.

Vectorized Retail Analytics Engine — TechMart System

- Implemented vectorized data processing with statistical anomaly detection, multi-axis analytics, and product correlation analysis.

Rule-Based Fraud & Anomaly Detection — Night-Shift Guard

- Designed an immutable event architecture with modular rule scoring and functional aggregation pipelines.

Server Log Analytics & Incident Detective

- Built log parsing and extraction capabilities with error-rate and IP-anomaly analysis.

Rule-Based Recommendation Engine — Pantry Chef

- Implemented set-algebra matching and functional token-normalization pipelines for recommendation generation.

PROFESSIONAL EXPERIENCE / TRAINING

Corvit Systems (NAVTTC) — AI & Machine Learning Developer

- Developed practical AI/ML systems covering regression, analytics, anomaly detection, recommendation systems, log analysis, and functional data-processing pipelines.
- Applied statistical evaluation, model diagnostics, vectorized processing, rule-based scoring, and modular system design.

Peak Solutions — Full Stack Web Development

- Developed responsive bakery and flower-shop web applications using HTML5, CSS3, JavaScript, PHP, and MySQL, including filtering, validation, cart sessions, inventory CRUD, order tracking, and administrative functionality.
- Applied JavaScript validation and PHP security sanitization for checkout and administrator login functionality.

EDUCATION & CERTIFICATION

BS Information Technology — Virtual University of Pakistan
Microsoft Azure Fundamentals
AI & Machine Learning Developer Training — Corvit Systems (NAVTTC)
