

LAIBA ZAHID

Data Scientist | ML Engineer

0371-0078177 laibazahidoffical@gmail.com Canal Bank, Lahore

Executive summary:

Dynamic AI Developer with 4+ years of experience building and deploying end-to-end ML, DL, and NLP solutions into production. Expert in Python, FastAPI, and Streamlit, specializing in Generative AI, LangChain, vector DBs, and Agentic AI workflows to deliver scalable, high-impact intelligent applications.

Core Competencies:

- Machine Learning (ML)
- Deep Learning (DL)
- Natural Language Processing (NLP)
- Generative AI
- Agentic AI Workflows
- LangChain
- Python
- FastAPI
- Streamlit
- Vector Databases

Skillset:

Artificial Intelligence

- Artificial Intelligence & Machine Learning:** Machine Learning (ML), Deep Learning (DL), Natural Language Processing (NLP), Natural Language Generation (NLG), Generative AI, Agentic AI Workflows
- Frameworks & AI Tooling:** LangChain, Vector Databases (DBs), Retrieval-Augmented Generation (RAG), Model Integration & Optimization
- Software Development & APIs:** Python, FastAPI, Streamlit, RESTful API Design, Microservices Architecture
- Deployment & Systems:** End-to-End Production Deployment, Cloud Integration, System Scalability, Application Optimization

Full-stack Web Development

- Frontend Development:** HTML5, CSS3, JavaScript (ES6+), Responsive Design, DOM Manipulation, CSS Flexbox/Grid
- Backend Development:** PHP, Server-Side Logic, RESTful API Integration, Form Processing & Validation
- Database & Data Management:** MySQL / MariaDB Integration, SQL Queries, Session & Cookie Management
- Web Practices & Tools:** Cross-Browser Compatibility,

Education:

BS Information Technology (Virtual University of Pakistan)

Professional Experience:

Corvit System (NAVTC)

AI & Machine Learning Developer:

Selected Hands-on Projects & Systems Implementation

Machine Learning ETA Predictor (QuickBite Delivery System)

- End-to-End Regression Architecture
- Statistical Evaluation & Validation
- Model Diagnostic & Residual Analysis

Vectorized Retail Analytics Engine (TechMart System)

- Vectorized Data Processing Pipeline
- Statistical Anomaly & Multi-Axis Analytics
- Pattern & Product Correlation Analysis

Rule-Based Fraud & Anomaly Detection Engine (Night-Shift Guard)

- Immutable Event Architecture
- Modular Rule Scoring System
- Functional Aggregation Pipelines

Server Log Analytics & Incident Detective

- Log Parsing & Extraction Engine
- Error Rate & IP Anomaly Analysis

Rule-Based Recommendation Engine (Pantry Chef System)

- Set-Algebra Matching Pipeline
 - Functional Token Normalization
-

Smart Triage Classification Engine

- Risk-Score Classification Architecture
- Transaction Ledger System
- Robust Exception Handling

Full Stack Web Development (Peak Solutions)

Interactive Bakery Shop Website (HTML5, CSS3, JavaScript)

- Developed a responsive storefront leveraging HTML5, CSS3, and JavaScript (ES6+) for an intuitive, modern shopping experience.
- Engineered interactive features including real-time product category filtering, custom order forms with client-side validation, and dynamic cart total calculations.
- Applied local storage methods for cart persistence and optimized visual components for fast load times across desktop and mobile browsers.

Flower Shop E-Commerce Site & Admin Dashboard (HTML, CSS, JS, PHP, MySQL)

- Engineered a full-stack flower shop web application with dynamic category filtering, interactive shopping cart sessions, and responsive styling.
 - Built a custom PHP/MySQL administrative panel to manage inventory CRUD operations, update stock/pricing, and monitor real-time order delivery statuses.
 - Applied JavaScript form validation and PHP security sanitization (XSS/SQLi prevention) across checkout and admin login forms.
-
